PPE

SAFETY HELMETS

www.ant5ppe.com | 1

Company Profile

Founded in 2009, we are a leading global manufacturer and supplier of high-performance Personal Protective Equipment (PPE). Our mission is unequivocal: to protect lives in high-stakes industrial environments. We engineer, test and deliver quality, comfortable and reliable safety solutions, empowering workers and businesses across construction, manufacturing, logistics and infrastructure sectors worldwide.

Our core PPE portfolio is designed to protect key human body parts:

- **Head Protection**: Advanced safety helmets and caps with superior impact/puncture resistance, adjustable suspension and sweat-wicking liners for all-day comfort.
- **Eye and Face Protection**: Full-range safety glasses, goggles and face shields, featuring anti-fog/scratch coatings to defend against impact, chemicals, debris and UV radiation.
- **Body Protection**: High-visibility reflective vests made of premium fluorescent fabrics, customizable in size and design for low-light/high-traffic work scenarios.

Our brand philosophy rests on three pillars:

1. **Uncompromising Quality**: All products pass rigorous testing and comply with international standards (ANSI Z89.1, CE EN 397, EN 12492:2012, ISO 9001), with strict QC from raw material sourcing to final inspection.
2. **User-Centered Design**: Lightweight, durable materials and adjustable features ensure comfort for consistent wear; on-site user testing refines our product designs.
3. **Reliable Supply Chain**: Our 20,000+m² facility with automated production lines and strategic inventory ensures timely delivery of large orders. We ship efficiently to over 50 countries/regions globally.

We tailor solutions for diverse clients to build long-term partnerships:

For Distributors & Agents

- High-margin, differentiated product portfolio with factory-direct pricing
- Co-branded marketing materials, digital assets, sales training and lead generation support
- Dedicated account managers, flexible MOQ and marketing subsidies

For Large Construction & Corporate Clients

- Large-volume orders with short lead times and customizable options (logos, colors, features)
- One-stop procurement with dedicated account managers and compliance documentation
- On-site safety consultations to optimize PPE deployment and reduce workplace injuries

At CHANGZHOU FUNTA SAFETY PRODUCTS MANUFACTURER CO., LTD., safety is a shared responsibility, not just a transaction. Experience the FUNTA difference of quality, user-centric design and reliable supply.

Contact us for a free consultation, product catalog or sample evaluation. Let's make our safety solutions your trusted supply chain partner.

Protect Your Workforce. Partner with Confidence. Choose FUNTA.

HEAD PROTECTION

It's time to **expect more** from our head protection

safety helmets are head protection products, used to prevent the adinjuries caused by accident and falling objects from high altitudes, and must be worninall industrial buildings and coalmining industries.Due to the different working environments, there are many types of industrial safety helmets. The protective properties of different materials of safety helmets are also different, but the ul-timate purpose of all safety helmets is to prevent and reduce head injuries, so we must have a qualified safety helmet and hardhat.

ANT5PPE brand safety helmet is your best choice.

Our goal is to guarantee the millions of workers' life more safety!

Premium details for better safety

Engineered to raise industry standards, all ANT5PPE® safety helmets come standard with a completely pre-assembled suspension system that includes 360-degree comfort padding around the entire head ring and our one-hand-turn wheel ratchet system.

More stability, coverage, and visibility

ANT5PPE® safety helmets well ventilated, lightweight and provides overall comfort to the wearer, more stability, coverage and visibility.

A variety of eye-catching colors can be customized, suitable for every fields and sites use.

For a faster, hassle-free solution when utilizing accessories, face shields and earmuffs are designed to be added, removed, and adjusted with ease, while also nesting tightly to the safety helmet to reduce neck strain .

Unrivalled anti-fog and scratch-resistant protection

ANT5PPE® face shield with anti-scratch&anti-fog coating

Comfortable, close-fitting protection with anti-fog and scratch-resistant technology.

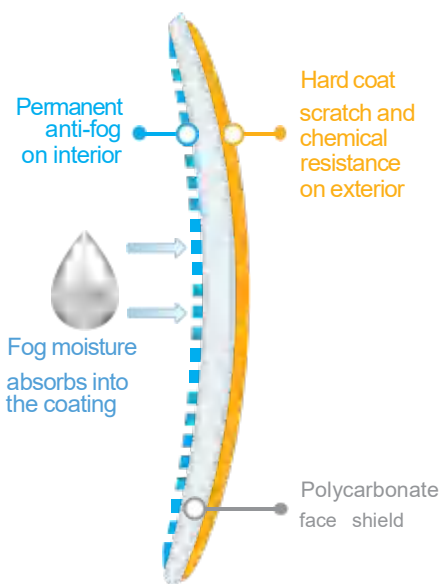

ANT5PPE® face shields are purpose-built to:

- Sit comfortably closer to the face for more protection
- Conveniently ANT5PPE® safety helmets with the accessory system
- Keep vision completely clear with ANT5PPE® anti-fog coating on the inside of the face shield and increase longevity with a scratch-resistant hard coat on the outside
- Nest evenly across the top of the helmet when pushed up and not in use, so wearers experience less strain and more balance
- Be compatible with ANT5PPE® earmuffs
- Meet ANSI Z87.1-2020, High Impact Z87+, CE EN166, standards

ANT5PPE® is a multipurpose dual coating that offers anti-fog protection on the inside of the face shield and a scratch-resistant hard coat on the outside of the face shield.

All ANT5PPE® coatings, have four unique characteristics:

- Permanent - it will never wash off
- Hydrophilic, absorbing properties
- Scratch-resistant
- Flow-coated

ANT5PPE® Earmuffs

Protect your hearing – comfortably

ANT5PPE® earmuffs for ANT5PPE® safety helmets

When it gets loud on the job, trust ANT5PPE® earmuffs for ANT5PPE® safety helmets to dampen the noise and comfortably protect your hearing. Every detail of the ANT5PPE® safety helmet system has been thoughtfully designed to deliver an advanced head protection solution. This includes face shield and earmuffs that make it simple to attach.

ANT5PPE® earmuffs are:

- Easily attachable to ANT5PPE® safety helmets via face shield system, or slot adapted directly to helmet when only hearing protection is required
- Snug-fitting for comfort and protection
- Available for varying decibel levels of noise reduction and color-coded for easy identification
- Lightweight with length adjustment options for various head shapes
- Comfortable with soft ear cushions that adapt to the surface and head shape of the wearer

SLC(80): 25.8dB CLASS 5

We've got you covered in harsh sun conditions

Designed with the construction worker in mind, this lightweight, easy-to-use safety helmet accessory extends superior shade protection by up to three inches to help protect areas on wearers' faces where there's high sun exposure on the job. Complete with a removable neck shade for extra back-of-neck protection, ANT5PPE® UV's firm, weather-resistant shade brim easily snaps right on to the hard hat for fast, secure, and easy-to-use utility – helping workers achieve better productivity and safety on the job.

Proper fit + care

How should your safety helmet fit?

Head injuries are the costliest injury in the safety industry, both literally and figuratively. There's an average of 85,000 injuries per year. The average cost per injury claim is almost \$80,000*. It's not enough to wear a safety helmet; it's equally as important that it fits correctly, so you're properly protected.

Use these tips to ensure your ANT5PPE® safety helmet fits properly:

- When you put your safety helmet on, suspension system should comfortably rest on your head
- Height can be adjusted with the variable slots in rear of suspension system for optimized comfort
- Use the one-hand wheel ratchet to ensure a snug fit, but not so tight that it causes discomfort or irritation
- Always wear your safety helmet with the brim of the helmet facing forward

ANT5PPE® safety helmets are not meant to be worn backward or reverse-donned, nor are they tested in this position, therefore compliance or performance cannot be guaranteed.

The do's and don'ts of caring for your ANT5PPE® safety helmet

- Do:**
- Perform daily inspections on your helmet and suspension system
 - Replace your helmet immediately if it sustains an impact
 - Clean your helmet and suspension system regularly with mild soap and water

- Don't:**
- Store items in or around the suspension system and shell while wearing
 - Leave your helmet sitting out in the sunlight after use
 - Use paint, chemicals, or other solvents on your helmet
 - Modify, engrave, or alter your helmet shell or suspension
 - Sit on your safety helmet
